

Wilson Reading System® Text Passages

*These resources enable you to incorporate enriched and non-controlled passages in Part 10 of the WRS Lesson Plan. **A story is provided each week at both levels.***

First, read the enriched text to the students while at the same time structuring their comprehension. Then present the same topic with similar information written at a decodable level. Since you have provided the schema or background information, you will have the opportunity to teach the students how to use context clues in combination with their decoding strategies.

Enriched Text

When reading enriched text to students, do not have them follow along while you read. They can simply listen and visualize or create a mental image of the text. Help them focus on meaning through periodic discussion, modeling of thinking, and retelling of the story using mental imagery as a guide for words. Draw simple picture representations and label them to aid their understanding of the content.

Non-Controlled Readable Text

Students require substantial practice applying their developing skills with non-controlled readable text. The non-controlled text should also be used with students as skills allow them to read the non-controlled text with 95% accuracy.

Work with your students, showing them how to apply the decoding skills (such as tapping or syllable division) if they struggle with a word that contains elements that have been taught. Use questioning techniques to guide them whenever words correspond to the structures you have taught. If they struggle with a word with untaught elements, you can simply direct them to context if it will be helpful or feed them the word. Be sure that passages are read for meaning.

The non-controlled readable text should also be used to practice fluent reading. Scoop the passage into phrases to model phrasing and expression. You can also use echo and choral reading. Read the same passage up to four times since students benefit from multiple readings.

** Please note: Passages marked by an asterisk indicate a non-controlled readable text written for WRS Students at the beginning of WRS Step 3 or higher.*

Permission is granted to the purchasing teacher to reproduce for use by his or her students only. No other part of this work may be reproduced or utilized in any form or by any electronic means or mechanical means, including photocopying.

Please note: The Coh-Metrix Text Easability Assessor website is no longer maintained. Please consider using the T.E.R.A. Coh-Metrix Common Core Text Ease and Readability Assessor [located here](#) to measure text passages.

Use of Differentiated Texts & Their Interrelationships for Students with Primary Decoding Deficits
