

Step 7

At the end of this Step, students should know how to:

- Read and spell words with the letter **c** or **g** when followed by an **e**, **i**, or **y**
- Read and spell words with additional Latin base elements **-duce-** and Greek combining forms: **tele-**, **-phone**
- Read and spell words with **dge**, **ph**, or **tch**
- Read and spell words that end in a final stable syllable with **tion** or **sion**; identify the **-ion** suffix
- Read and spell contractions and possessive nouns
- Use a dictionary or spell-checking technology for spelling option work

Sequence of Word Study Skills

7.1 Sound options for **c** and **g** when followed by **e**, **i**, **y** (city, gentle); complex words with new Latin bases (reduce); with taught affixes (replace, cycles)

7.2 **ge** or **ce** preceded by a consonant (fence, challenge); trigraph **dge** (bridge); with taught affixes (rejudge, edges)

7.3 New trigraph and digraph: **ph**, **tch** (phone, match); with taught affixes (rematch, itches); Greek combining forms (**-photo-**); words with these forms (photograph, telephoto); vowel shifts

7.4 New final stable syllable containing the noun-forming suffix **-ion**: **tion**, **sion** (location, expansion, vision, instruction)

7.5 Contractions (didn't, I'll); possessive nouns (David's, spacecrafts')

In Step 7, you will teach sound options for reading, and spelling options for writing. For reading, you will teach students that letters may make more than one sound. Students have been previously introduced to this with the letter **s** **/s/** and **/z/**. Now you will teach that **c** can say **/k/** or **/s/**, and that **g** can say **/g/** or **/j/**. When reading, students will now need to pay attention to the vowel that follows these letters. When followed by **e**, **i**, and **y**, the sound of **c** is **/s/** and **g** is **/j/**. These "soft" sounds are less common. The students will also learn to think about spelling options. They will be taught a procedure to follow when a sound might be spelled in more than one way.

Students will also learn several new sounds: **dge** **/j/** and **tch** **/ch/**, **ph** **/f/**. Students will learn that **dge** and **tch** are trigraphs: three letters with one sound. Both spelling generalizations and the spelling option procedure will be used for spelling these words. Students will learn the generalization that words in English do not end with the letter **j**. If the vowel is short, the word is spelled with **dge**, and if long, it is spelled with **ge**. Students will also learn the generalization that most words that have **/ch/** directly after a short vowel are spelled with the **tch**.

Students will learn 10 more Latin base: **-cede-**, **-cept-**, **-cess-**, **-cide-**, **-cise-**, **-cite-**, **-duce-**, **-scend-**, **-sess-**, **-side-**. They will read and spell complex words with these elements.

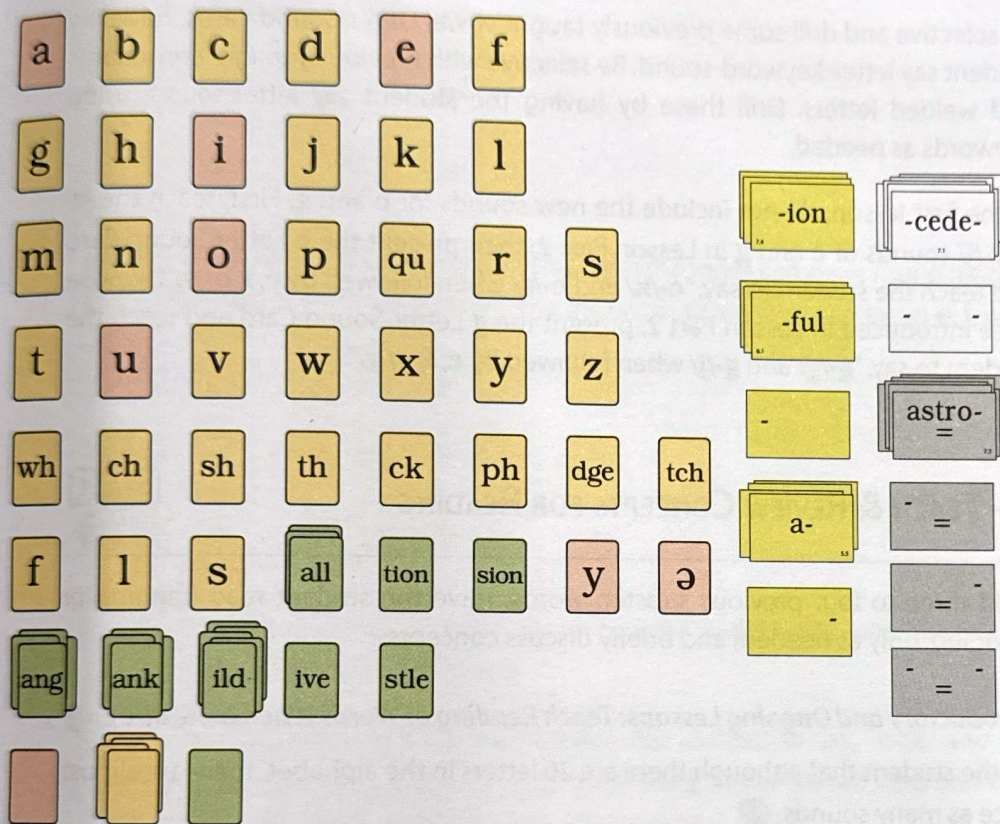

They will learn some common Greek combining forms and learn to read and spell words with these combinations: **astro**, **gram**, **graph**, **logy**, **ology**, **micro**, **mono**, **path**, **phone**, **phono**, **photo**, **scope**, **sphere**, **tele**.

Students will also learn the welded sounds **tion** **/shun/** and **sion** **/shun/**, **/zhun/**. They will learn that the letters **tion** and **sion** are always found as the last syllable in a word (before adding any other suffixes), forming another kind of final stable syllable. Students will learn to both read and spell words with these final stable syllables. For spelling, they will use generalizations, spelling option procedures, and/or the word element structure of a word. Students will learn that the **ion** within the final stable syllable with **tion** or **sion** is actually a suffix: **product**(**ion**). This advanced concept can help students understand the meaning of the word, as well as the word structure for both reading and spelling.

Lastly, students will learn how to read and spell contractions (**we'll**, etc.) and possessives (**Bill's**, etc.).

There is much to study about word structure in Step 7. It can be a difficult Step. Take the time needed for mastery. Do not rush.

By the end of this Step, Standard Card Display for Teacher

Teacher Materials Needed

- See graphics on this page and add Letter-Sound Cards and Word Element Cards (prefixes, base elements, suffixes) when introduced
- Substep-specific Word Cards
- Step 7 High Frequency Word Cards
- Dictation Book (Steps 7-12)
- Rules Notebook
- End-of-Step Assessment Teacher Guide and Student Progression Recording Forms (Steps 7-12)
- An index card with an apostrophe:

Student Materials Needed

- Provide Letter Tiles when introduced, as shown
- Student Reader Seven
- Student Notebook (Steps 7-12)
- My Step Progress Booklet (Steps 7-12)

Supplemental Materials

- Word Element Detective Workbook (Steps 7-12)
- Student Workbook Step 7

Block 3 Guide

The following pages outline Word Study and Spelling for Parts 1-8 (Blocks 1 and 2 of the lesson). Guidelines for planning Parts 9-10 (Block 3) of the lesson can be found in the **Comprehension and Fluency Block 3 Guide**.

Substep Cards/Tiles to be added

7.1	-cede-	-cess-	-cept-	-cide-	-cise-
	-cite-	-duce-	-scend-	-sess-	-side-

7.2 dge

7.3	ph	tch	astro-	-gram-	-graph-	-logy	-ology	micro-
			mono-	-path-	-phone	phono-	-photo-	-scope
			-sphere-	tele-				

7.4 tion sion -ion

7.5 , ,

Word Study

Using Syllable Cards, form the multisyllabic word **magic**.

mag	ic
-----	----

Ask, "What does the **g** say in the word **magic**?" (/j/). Ask, "Why?" (Because the **g** is followed by the letter **i**.) ①

Write the words **cent** and **stage**. Teach how to mark the sounds of **c** and **g**.

/s/ /j/
cent **stage**

Student Notebook Entry

(Sounds Section) On the Consonants page, have the student find the additional sounds of **c** and **g**. Have the student enter the letters **e**, **i**, and **y** on the spaces provided. Then have the student practice the new responses for **c** and **g**:

"**c**-/k/ and /s/ when followed by **e**, **i**, or **y**"

"**g**-/g/ and /j/ when followed by **e**, **i**, or **y**"

Have the student practice marking the words **cent** and **stage**.

/s/ /j/
cent **stage**

On the Jobs of Silent e page, have the student enter the words **rice** and **page**.

Build the words **cycle** and **suggest** with Syllable Cards. Have the student scoop and read the words. Ask the student, "What does the **c** say in the first syllable of the word **cycle**?" (/s/). Ask, "Why?" (Because the **c** is followed by the letter **y**.) Also point out the /k/ sound in the second syllable (**c** not followed by an **e**, **i**, or **y**). Next, explain that the letter **g** makes both its sounds in the word **suggest**. Have the student scoop the word while reading it, then identify the sounds of **g**.

/s/	/k/	/g/	/j/
cy	cle	sug	gest

Then, write the words **concentrate** and **gigantic** on blank index cards. Have the student scoop the syllables and read the words, then mark the sounds of **c** and **g**.

/k/	/s/		/j/	/g/	/k/
con	cen	trate	gi	gan	tic

FYI

The sound of **c** or **g** followed by an **e**, **i**, or **y** may be soft (/s/ or /j/) even when the **e**, **i**, or **y** is located in a different syllable.

mag ic

leg end

ca pac ity

Weave with Questions

Avoid the questions:

Is this **c** (or **g**) hard or soft?

Rather ask,

What sound does the **c** (or **g**) make in this word? Why?

Subsequent Lessons: Teach Additional Closed and v-e Syllable Latin Bases;
c=/s/, g=/j/ in Words With Taught Affixes

TEACH ADDITIONAL CLOSED AND V-E SYLLABLE LATIN BASES

Build **duce** with your Letter-Sound Cards and have the student read it:

Next, show the student the Substep 7.1 Latin-base Card **-duce-**. Remind the student that a prefix can be combined with a base element to make a complex word and that a base element contains the most important part of a word's meaning. Tell the student that the base **-duce-** is related to the previously learned base **-duct-** which means "to lead." Find the Closed-Syllable Latin Bases page in the Word Elements section of the Student Notebook.

Build the word **reduce** using the yellow Prefix Card **re-** and the white Latin-base Card **-duce-**:

Explain that the prefix **re-** is combined with the Latin base **-duce-** to make a complex word. Discuss the meaning of the word (to lead back).

Change the prefix to **pro-** to make the word **produce**. Have the student scoop and read it, discuss its meaning (lead forth), and ask questions about its word structure. Change the Latin base element to **-duct-** to make the word **product**. Discuss that a *product* is something that has been *produced* (usually to sell). ①

Write the Latin base **-duce-**. Remind the student how to mark a base element by telling the student to put a dash before and after to indicate that something might be added before and/or after it to make a longer word:

-duce-

Then, write the word **reduce** and remind the student that it can be marked two ways:

Mark Syllables. Scoop and mark syllables:

Mark Word Elements. Segment the complex word and mark word elements:

FYI

Note that the first vowel in the word

product has a schwa. The same prefix can sometimes be pronounced with a long vowel sound, or with the reduced schwa, depending on the base element or even its use in a sentence.

Word Study

FYI

You can divide the list into two

separate lessons. Although you will tell students the meaning of the bases, for now, you will emphasize their decoding and spelling. Over time, students will gradually learn their meaning with words and in context.

Next, using Letter-Sound Cards, make each of the following Latin bases and have the student read them. Share their meanings and together brainstorm words that contain them. 

-cede-, **-cess-** go, yield (recede, recess)

-cept- take, seize, hold (accept, receptacle)

-cide-, **-cise-** cut, kill, slay (decide, precise)

-cite- call, arouse (excite, recite)

-duce- lead, bring (produce, reduce)

-scend- climb (ascend, descend)

-side-, **-sess-** to sit (preside, obsess)

Student Notebook Entry

(Word Elements Section) As you build each Latin base, have the student add it to the Latin Bases Which Can Occur in Closed Syllables page or the Latin Bases Which Occur in Vowel-Consonant-e Syllables page beside its meaning.

Have the student mark the Latin bases with a dash before and after:

-cede- **-cess-**

Also, have the student underline each v-e base without the **e** (except **-duce-**), telling students that sometimes the Latin base is in a word without the **e**.

-cede-

Using Prefix Cards and the new Latin-base Cards, make complex words (such as **excess**, **decide**, **concept**, and **reside**) and have the student read them.

When you make the word **reside**, discuss the pronunciation of the **s**. Remind students that when **s** is between two vowels, it usually says /z/. 

FYI

The Latin bases **-side-** and **-sess-**

are included here to help students select the correct spelling option (**c** or **s**) for words with these bases.

You will notice that complex words with **-side-** often have a prefix that ends in a vowel (**reside**, **preside**).

Word Study

c=/s/, g=/j/ IN WORDS WITH TAUGHT AFFIXES

Make the word **place** with your Letter-Sound Cards and have the student read it. Then, add the yellow Prefix Card **re-** to make the word **replace**:

Ask the student to name the “main part of the word” or the base word (**place**) and the prefix (**re-**). Remind the student that a prefix can also be added to a stand-alone word, rather than be part of a complex word. Discuss the meaning of **replace** versus **place**.

Remind the student that affixes (both prefixes and suffixes) can be added to a base word. Add the yellow Suffix Card **-ment** to make the word **replacement**:

Have the student read the word, naming the word without the suffix first: **replace-replacement**

Add the suffix **-s** to form **replacements** and have the student read it. Ask the student to identify the base word, the prefix, and the two suffixes.

Build additional words with taught affixes for the student to read, such as **nicely**, **disgraceful**, and **gentleness**.

NONSENSE WORDS

Once the student is solid with the reading of real words, present nonsense words with soft **g** and **c** sounds. Have the student read words, discussing the sound of the **c** or **g** in each word.

Note

Many of the Substep 7.1 words end with an **e**, so vowel suffixes should not be added at this point.

Adding a vowel suffix to a word that ends in the letter **e** causes the **e** to be dropped. For example:

place + ing = placing

This concept will be taught in Step 10.

For now, all suffixes will only be added to *unchanging* base words. Use the Student Reader and/or Dictation Book to carefully select Substep 7.1 words with suffixes.

3 - WORD CARDS

bat

Phonetically Regular Words: Have the student read a "fat stack" of previous substep words, focusing on automaticity and weaving discussion of selected concepts and previously introduced vocabulary words. Then, use current substep Word Cards to focus on new concepts, decoding accuracy, and, as mastered, automaticity. Also target new vocabulary words, having the student enter these into the Student Portfolio. Vary Word Card Activities as appropriate.

Activity Idea: Present the following Word Cards from Substep 7.1 and previous substeps: **cent, civil, call, decide, contact, volcano.** You can also make additional Word Cards such as **policy, custom, trace, cement, clip, and complete.**

Have the student read each word then place it in a column based on the sound of the letter **c**:

c = /k/

c = /s/

call

1.AAB

cent

7.1AB

contact

3.3AB

civil

7.1AB

volcano

5.AAB

decide

7.1AB

Do the same with the following Word Cards that contain the letter **g**: **stage, gum, grand, digest, golden, deregulate.** Additional Word Cards can be made with words such as **gate, angle, wage, rigid, dragon, and gene.**

Word Element Cards: As needed and occasionally, have the student read a separate packet of Word Element Cards (prefixes, base elements, suffixes), focusing on automaticity and weaving discussion of meaning.

After you introduce the Substep 7.1 Latin bases, include these in the Word Element Card packet. ❶

High Frequency Words: Have the student read the high frequency word packet separately from the phonetically regular words. Include previously introduced words until mastered and introduce new high frequency words a few at a time.

**FYI**

Remind students that when the letter

s is between two vowels, it usually says /z/. Read the Latin base **-side-** two ways: /s/ide and /z/ide.

Word Study

4 - WORDLIST READING

Practice: From the current substep wordlists, select 5-6 words from a single wordlist that reflect your instruction for that day and have the student read them for practice. Discuss current concept, targeting trouble spots.

Charting: Using another wordlist that also reflects your instruction from the current substep, have the student read 15 words aloud. Then, record all errors on the Wordlist Chart. Discuss and correct all errors with the student.

The following types of wordlists are provided:

- **c** = /s/, **g** = /j/
- **c, g** (hard and soft sounds, mixed)
- Latin bases
- new Latin bases (all elements taught)
- **c** = /s/, **g** = /j/ in words with taught affixes (prefixes and/or suffixes)
- nonsense words ⓘ

5 - SENTENCE READING

Review high frequency words and untaught words at the top of the page as needed. Select ten sentences from the current substep and have the student read them silently, then aloud (one sentence at a time). Focus on accurate word reading, expression (prosody and intonation), and meaning of text. To develop fluency, model and practice proper phrasing of text, using the penciling technique as needed. Weave questions about concepts taught in current and previous substeps and discuss vocabulary and meaning.

Varied sentence pages are provided. Be sure you select the appropriate lists as you teach the concepts presented in this substep.

FYI

You will begin charting nonsense word reading at Lesson Part 4 only after the student demonstrates accuracy and automaticity with reading all types of real words at this substep.

Spelling

6 - QUICK DRILL IN REVERSE

Dictate a selection of previously taught vowel, consonant, and welded phonemes. Prompt the student to repeat the sound and then name the letter(s) while pointing to the appropriate Letter Tile(s).

Have the student repeat the sound /s/. Then ask, "What says /s/?" (The student should select **s** and **c**.) Have the student put the vowel letter tiles **e**, **i**, and **y** after the **c** to demonstrate when it will say /s/:

s → **c** **e** → **c** **i** → **c** **y**

"**s** and **c** - before **e**, **i**, or **y**"

Also ask, "What says /j/?"

j → **g** **e** → **g** **i** → **g** **y**

"**j** and **g** - before **e**, **i**, or **y**"

Dictate selected taught word elements (prefixes, suffixes, and base elements) only as needed. Prompt the student to repeat the word element, select the appropriate manipulative (blank Prefix Tile, blank Suffix Tile, or blank index card with dashes to represent a base element), and then write it on the table with a finger while orally spelling, adding the dash(es) as needed. The Student Notebook may be referenced as needed.

After the student learns the additional Latin base elements introduced at Substep 7.1, include them when dictating word elements for Part 6. Dictate the bases by saying the base, the meaning, then the base again. ①

"/**cēss**/ - go or yield - /**cēss**/" or "/**sīde**/ or /**zīde**/ - to sit - /**sīde**/ or /**zīde**/"

This will help the student learn the meaning of the bases as well as help to select the right base when two bases are pronounced the same. ①

FYI

If a base can be pronounced with /s/ or /z/ such as **-side-**, be sure to give each pronunciation. See Dictation Book for guidelines.

FYI

Encourage students to keep their notebook open to the Latin bases for reference during Lesson Parts 6, 7, and 8.

Spelling

7 - TEACH & REVIEW CONCEPTS FOR SPELLING

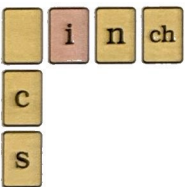

Dictate three to four previous substep words. Prompt the student to repeat the word (segmenting as needed) and then spell the word with the Letter Tiles or Word Element Cards (prefixes, base elements, and suffixes) and Syllable Cards. For one-syllable words, the student may subvocally say the sounds while building the word, if needed. The student should spell the word orally after it is built with the Letter Tiles.

Introductory and Ongoing Lessons: Teach Spelling Option Procedure With /s/ and /j/ Sounds

Dictate the word **cinch**. Have the student tap the sounds and identify which sound has more than one way to spell it. Then, have the student select a blank consonant tile (ivory) for the /s/ sound, explaining that there are spelling options now for this sound:

Ask the student, "What says /s/?" (**c** and **s**). Have the student place the options underneath the blank tile:

Tell the student that only one option is correct. Have the student cover the blank tile with each option one at a time, and ask, "Which option do you believe is correct?"

Teach the student how to use a spell-checking technology device or a dictionary to determine the correct option. Once the correct spelling option is determined, be sure to have the student place the correct tile and orally spell the word.

Next, dictate the word **page**. Have the student tap out the sounds and find the corresponding tiles. Ask the student if any of the sounds have a spelling option.

Ask the student, "What says /j/?" The student should respond (**j**, **g**). Place the **j** and **g** tiles under the blank tile. Next, explain that no word ends with the letter **j**. If the word has a long vowel sound, use **ge**. Dictate additional previous substep and Substep 7.1 one-syllable words with the /j/ and /s/ sounds, such as **send**, **gene**, **place**, and **jet**. Have the student use a blank tile and a dictionary or spell-checking technology to determine the correct spelling.

Note

When dictating a word such as **cell**, use the word in a sentence to help your student understand which homophone (**cell**, **sell**) you are dictating. Both spellings are real words but **c-e-l-l** is the correct spelling for a microscopic unit of an organism.

Spelling

Student Notebook Entry

(Spelling Section) On the Spelling Options for Sounds: Consonant Sounds page, have the student enter **s** next to the word **snake** and **c** next to the word **cycle** to indicate these spelling options for the sound /s/.

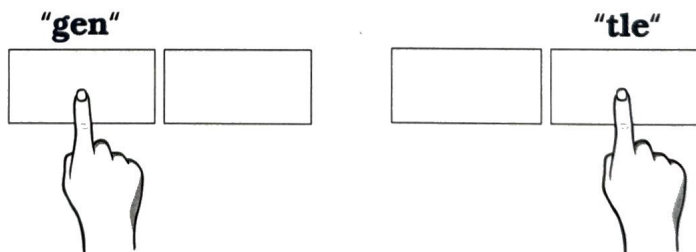

Then, have the student enter **j** next to the word **jug** and **g** next to the word **gentle** to indicate these spelling options for the sound /j/.

Explain to the student that because they now know the letter **c** will say /s/ before an **e**, **i**, or **y**, that when spelling words with the /k/ sound at the beginning, the letter **k** should be used before the letters **e**, **i**, and **y**. Examples of this include words such as **kept**, **kite**, and **kettle**.

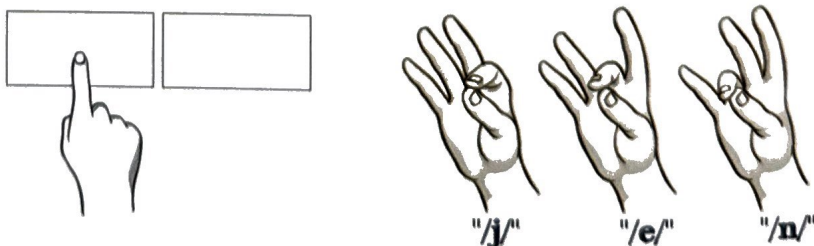

Student Notebook Entry

(Spelling Section) On the Ways to Spell /k/ page, have the student enter example words for the /k/ sound at the beginning of a word when it is followed by an **e**, **i**, or **y**. **Ken, kite, Kyle**.

When ready, apply the spelling option procedure with multisyllabic words. Place the Syllable Cards facedown. Dictate the word **gentle** and have the student repeat the word then name the syllables.

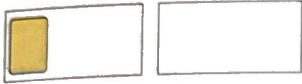

Ask the student, "Do you hear a sound in either of these syllables that has a spelling option?" (yes). Have the student point to the syllable and tap the sounds in that syllable.

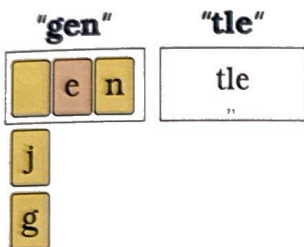

Spelling

Ask the student, "Which sound has the spelling option?" (/j/).

Then, tell the student to place a blank consonant tile where the spelling option is located.

Have the student name each syllable again and build that syllable with tiles. Next, have the student place the spelling options under the blank tile. Have the student name and spell the remaining syllable without a spelling option, then flip the card over to check.

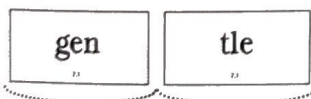

Next, have the student determine the correct spelling for the option. Tell the student to place each option over the blank tile, and ask the student which letter (option) is correct:

The student should use a dictionary or spell-checking technology to determine the correct spelling then replace the blank tile with the correct Letter Tile.

Then have the student name and orally spell the word, one syllable at a time, flipping over the Syllable Card with the option to check. Have the student read the word back to you, scooping the syllables with a finger.

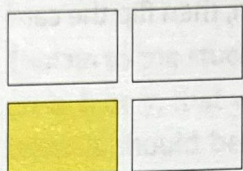

Dictate additional previous substep and Substep 7.1 multisyllabic words with /j/ and /s/ sounds for the student to spell, such as **settle**, **jelly**, and **cycle**, following the procedure above.

Spelling

**Subsequent Lessons: Teach Complex Words With New Latin Bases;
Teach Spelling of Words With c=/s/ or g=/j/ and Taught Affixes**

TEACH COMPLEX WORDS WITH NEW LATIN BASES

After you have introduced the new Latin bases, include complex words with these new bases, using the same procedures as with other complex words. Place two blank white Syllable Cards down on the table. Dictate the word **excite** and have the student repeat. Then, under the blank white cards, place the yellow Prefix Card **ex-** and the white Latin-base Card **-cite-** facedown.

FYI

Because **excite** is a complex word with a taught base element, students should know to use the letter **c** to spell /s/ in **-cite-**. Have the Student Notebook open to check base element spelling.

Tell the student that the word **excite** is a complex word. Have the student follow the multisyllabic spelling procedure, naming and spelling one syllable at a time, turning over the Word Element Cards to confirm spelling. ①

Next, dictate the word **produce**. Have the student spell it, using the above procedure. After the student turns over the cards to confirm the spelling, change the Latin base **-duce-** to **-duct-** to make the word **product**. Remind the student that these two bases are related (see Student Notebook Word Element section). Discuss that a **product** is something that has been **produced** (usually to sell).

Explain that the pronunciation of **pro** is different in the words **produce** and **product**. Ask which one has a schwa (**product**). Explain that sometimes a schwa will happen when different word elements are combined. If the student knows the word elements, it will help the correct spelling of the word, even when it has a schwa. Dictate the word **process**, placing the Word Element Cards facedown. Tell the student that this word has two known word elements, but one of the syllables has a schwa. Have the student name and spell each part and turn over the card to confirm its spelling.

Practice additional complex words such as **decide** and **reduce**. Be sure to tell the student when you dictate a complex base word. ①

TEACH SPELLING OF WORDS WITH c=/s/ OR g=/j/ AND TAUGHT AFFIXES

Once the student is solid with the spelling option procedure for one-syllable and multisyllabic words, dictate words with taught prefixes and/or suffixes for practice, such as **recycle**, **budgeting**, **priceless**, and **disgraceful**. ①

FYI

The words **accept** and **except** are often confused.

except = to leave out, take out

accept = to take willingly

The spelling of **accept** will be further studied with assimilating (chameleon) prefixes in Step 12.

FYI

Use the Dictation Book to select words with suffixes carefully. It is important to avoid, for now, words such as **staged** (**stage** + **ed**) where the base word changes.

8 - WRITTEN WORK DICTATION

Dictate sounds, word elements, words, and phrases from previous and current substeps. Also, dictate sentences from the current substep. Be sure the student repeats all dictation prior to spelling. Have the student circle high frequency words, then guide the proofreading process for phrases and sentences. Direct the student to mark some concepts in words and sentences and scoop the sentences into phrases.

Include the new Latin base elements after they are taught in Part 2. ①

Have the student mark them with dashes before and after:

-duce-

Also, include complex words with the taught Latin base elements.

Remind the student that these words can be marked in two ways:

Mark Syllables. Scoop and mark syllables:

rēdūce
o v-e

Mark Word Elements. Or, segment the base word and mark word elements:

re duce ①
-|-

Mark Words

Mark sounds of **c** and **g**:

/s/ /j/ /k/ /s/
trace logic concentrate

Scoop and mark syllables:

dīplāce prōdūce
c v-e o v-e

Underline base word and circle prefixes and suffixes.

displace priceless

And, as directed, segment and mark word elements:

spaceship ① -duce- produce
= | = -|-

FYI

Remember to dictate the base, say meaning, then say the base again: "sess - to sit - sess." This helps to solidify meaning. It is also important to help students select the spelling when two bases sound alike (cess, sess).

FYI

For word elements, do this marking with the student and only with words that have taught elements. Discuss what these markings mean.

FYI

Optionally, students can add an arrow when the first word describes the second one in a compound word:

spaceship
= | =
