

Step 2

At the end of this Step, students should know how to:

- Identify welded sounds for the graphemes:
ang, ing, ong, ung, ank, ink, onk, unk, ild, ind, old, olt, ost
- Define a syllable and identify a closed syllable and a closed-syllable exception
- Differentiate between a blend and a digraph
- Identify and read words with two-letter blends, three-letter blends, and digraph blends
- Read and spell words or nonsense syllables with a short vowel (up to six sounds)
- Recognize common closed-syllable Latin bases

Sequence of Word Study Skills

- 2.1 ang, ing, ong, ung, ank, ink, onk, unk** (bang, pink); + suffix **-s** (kings)
- 2.2** Four sounds in a closed syllable; + suffixes **-s** or **-es** (flag, steps, brushes)
- 2.3** Closed-syllable exceptions: **ild, ind, old, olt, ost** (mold, host)
- 2.4** Five sounds in a closed syllable; + suffixes **-s** or **-es** (spend, crafts, branches); 15 closed-syllable Latin bases (-rupt-, -sist-, etc.)
- 2.5** Three-letter blends and up to six sounds in a closed syllable; + suffixes **-s** or **-es** (sprint, scraps, stresses); 15 closed-syllable Latin-base elements with a **ct** blend (-duct-, -spect-, etc.)

In Step 2, you will continue to work with short vowels. Students will learn how to blend and segment four sounds, then five sounds, then six sounds in a given syllable. Students must be able to segment the sounds independently. If students cannot do this, do not move on, even if the students read and spell the words correctly. This mastery is essential for future success. You will use Letter-Sound Cards, blank cards, and finger tapping to teach this skill with nonsense syllables as well as real words.

At the beginning of this Step, the students will learn about closed syllables. Emphasize this concept throughout the step as it is important that students visually recognize closed syllables. The students should know that if a syllable is closed, **then** the vowel sound is short. Thus far, students have been reading and spelling base words and suffixes. Together, these words have two elements, but the base words by themselves have been simple words—that is, they have had only one word element.

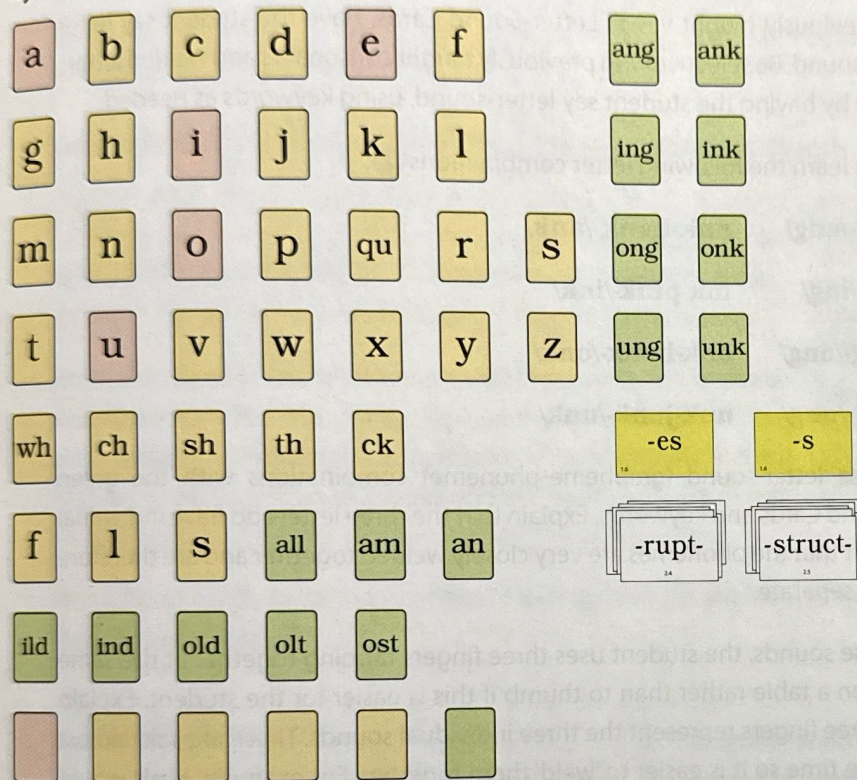

You will also introduce a new word element: closed-syllable Latin bases such as **rupt** (**dis-rupt**), **ject** (**sub-ject**), and **pend** (**sus-pend**). These look like nonsense words, but they have meaning, are part of longer words, and actually carry the main meaning of a word. Some of the Latin bases can stand alone as a word (**duct**), as well as combine with other elements (**conduct**, **deduct**, **induct**) to form the base word. However, most of the Latin bases, **must** be combined with another element either before or after it (**disrupt**, **rupture**) in order to form a word.

In Step 2, students will read and spell Latin bases in isolation. This will prepare them to combine these bases with other word elements to form longer words, which begins in Step 3. Although you will introduce students to the meaning of the bases, understanding its meaning will happen over time, as words are formed in subsequent Steps.

Students will work with Latin bases using Latin-base Syllable Cards. These cards can be recognized by the dash both before and after the word element called a base:

-rupt-

By the end of this Step, Standard Card Display for Teacher

Substep Cards/Tiles to be added

2.1	ang	ing	ong	ung	
	ank	ink	onk	unk	
2.2					
2.3	ild	ind	old	olt	ost
2.4	-rupt-				
2.5		-struct-			

Teacher Materials Needed

- See graphics on this page and add Letter-Sound Cards and Word Element Cards (prefixes, base elements, suffixes) when introduced
- Substep-specific Syllable Cards
- Substep-specific Word Cards
- Step 2 High Frequency Word Cards
- Dictation Book (Steps 1-6)
- Rules Notebook
- End-of-Step Assessment Teacher Guide and Student Progression Recording Forms (Steps 1-6)

Student Materials Needed

- Provide Letter Tiles when introduced, as shown
- Student Reader Two
- Student Notebook (Steps 1-6)
- My Step Progress Booklet (Steps 1-6)

Supplemental Materials

- Word Element Detective Workbook (Steps 1-6)
- Student Workbook Step 2
- Wilson Fluency®

Block 3 Guide

The following pages outline Word Study and Spelling for Parts 1-8 (Blocks 1 and 2 of the lesson). Guidelines for planning Parts 9-10 (Block 3) of the lesson can be found in the **Comprehension and Fluency Block 3 Guide**.

Word Study

What to Teach

- o New "welded" letters:
ang ing ong ung
ank ink onk unk
- o Reading and spelling words with the welded letters and sounds listed above
- o Definition of a syllable
- o Identifying a closed syllable

FYI

If needed, the student can learn the **-ng** welded letter combination first, then learn the **-nk** letter combination in a later lesson.

a

1 - SOUNDS QUICK DRILL

Drill all previously taught vowel Letter-Sound Cards. Have the student say letter-keyword-sound. Be selective with previously taught consonants and welded letters. Drill these by having the student say letter-sound, using keywords as needed.

Student(s) learn the following letter combinations ①:

ang-fang-/ang/ **ank-bank-/ank/**

ing-ring-/ing/ **ink-pink-/ink/**

ong-song-/ong/ **onk-honk-/onk/**

ung-lung-/ung/ **unk-junk-/unk/**

Teach these letter-sound (grapheme-phoneme) combinations with the green Letter-Sound Cards and keywords. Explain that the three letters do have individual sounds, but that the phonemes are very closely welded together and are therefore difficult to separate.

To tap these sounds, the student uses three fingers tapping together at the same time. Tap on a table rather than to thumb if this is easier for the student. Explain that the three fingers represent the three individual sounds. These are said almost at the same time so it is easier to 'weld' them together. For example, **sink** would be tapped:

/s/ (one tap)

/ink/ (one tap with three fingers)

Student Notebook Entry

(Sounds Section) On the **-ng** and **-nk** Welded Sounds pages, have the student add the keyword pictures for the new welded sounds:

ang ing ong ung

ank ink onk unk

2 - TEACH & REVIEW CONCEPTS FOR READING

Build three to four previous substep words. Have the student read (tapping only if needed) and briefly discuss concepts.

Introductory and Ongoing Lessons: Teach Reading of Welded Sounds

Display Letter-Sound Cards as pictured on the right and point to each card while saying the sound: /**ang**/, /**ing**/, /**ong**/, /**ung**/, /**ank**/, /**ink**/, /**onk**/, /**unk**/. Then, read them across /**ang**/, /**ank**/, etc. Have the student repeat after you, then do independently.

ang	ank
ing	ink
ong	onk
ung	unk

Next, the student should practice reading words. Place the **s** consonant card in front of **ang**. Tap out the word **sang**: /s/ (one tap) - /**ang**/ (one tap with three fingers). Then move the **s** card in front of **ank** and tap out **sank**. Create words with all of the welded sounds. Have the student tap and blend each word.

When these words can be read without tapping, have the student read words with the suffix **-s** added. ①

Student Notebook Entry

Page 6-7

(Sounds Section) On the **-ng**, **-nk** Welded Sounds pages, have the student practice marking welded sounds:

long ring hung
bank think junk

Write the word **bank** and teach the student to box the three-letter welded sound:

bank

Subsequent Lessons: Teach Closed-Syllable Concept

You will next teach about closed syllables. Explain that words have parts that go together called syllables. A syllable is a part of a word that can be pushed out in one breath. **Cat** is one syllable. **Catnip** has two syllables.

Explain that there are six kinds of syllables and first you will teach the one that is used the most in English words. Form the word **bat**. Tell the student that a closed syllable has one vowel only (point to **a**) and must be closed in (move the **t** closer to the **a** to show how it closes it in). A closed syllable gives the vowel the short sound; /ă/ is the short sound of **a**. Now remove the **b** to leave the word **at**. Tell the student that there need not be a consonant in front of the vowel. The important point is that one vowel (point to **a** and stress that it is only one vowel) is closed in (move **t**) by at least one consonant. Make the word **bath**. Tell the student that it can be closed in with more than one consonant (point to **th**).

Note

Technically **ng** is a digraph and **nk** is a

blend. Therefore, **ing** has two sounds and **ink** has three sounds. The student learns these sounds best, however, when presented as 'welded'. The discussion of blend (taught at Substep 2.2) versus digraph and number of sounds can be avoided unless questioned by student.

FYI

Remember that for words with a suffix,

the student **taps only the base word**, if needed. The suffix is **not** tapped.

READING SUFFIXED WORDS IN ISOLATION

Word How it is read

shells: shell-shells

thinks: think-thinks

Word Study

Note

The Letter-Sound Cards must be used to teach

the closed-syllable concept in a multisensory way. Use this procedure building other words to continually review this concept throughout Step 2. Avoid using **h, r, y,** and **w** at the end - **ah, bar, bay, saw...** these are not closed syllables. Do not explain them yet; just avoid them!

FYI

When the student is asked to describe

a closed syllable, the reply should not be, "a closed syllable is a syllable with a short vowel." Rather, it should be, "a closed syllable is a syllable with one vowel, closed in by consonant(s), and this tells us the vowel is short." The purpose of teaching this is so that the student, upon visual recognition of a closed syllable, knows how to read the vowel. The goal is to teach the student to **recognize** when a syllable is closed by seeing the pattern.

FYI

The letter **l** in the word **links** is part of a welded sound, but **link** is a closed syllable as well. Therefore, the **l** has a short sound.

Next, use the Letter-Sound Cards to build the following words:

s u ch i t sh e l o a f

Ask the student to point to the closed syllables (**such, it**). Discuss each word, asking the student to explain why or why it is not a closed syllable.

such has one vowel closed in with **ch**

it has one vowel closed in by **t**, no need for any letter before the vowel

she has one vowel but it is not closed in

loaf has two vowels

Be sure to emphasize that a closed syllable is a syllable that has one vowel (not a short vowel). The fact that it is closed then **tells** the student the vowel is short. This is important because the teaching of the syllable type is to aid in the decoding of unknown words. If a word is unknown (such as **vat**), the student can figure it out by determining if it is a closed syllable, then applying the short sound of a (using the keyword **apple**). ①

Have the student practice reading closed-syllable words from Step 1 and Substep 2.1. Also, demonstrate closed-syllable words with the suffixes **-s** and **-es**. Then, write the word **job**. Teach the student how to mark a closed syllable, scooping the syllable first. Then, identify the type of syllable with a **c** for closed. Finally, mark the vowel with a breve to show that it makes a short sound (as in **apple**). Be sure to mark the vowel last, emphasizing that **if** the syllable **is** closed, **then** the vowel is short:

job **job** **jōb**
c c c

Lastly, show the student that if the word has a suffix, it will be marked like this:

jōb@s or **job@**
c c

When ready, include nonsense words, but do not begin charting these at Lesson Part 4 until the student has demonstrated accuracy and automaticity with all types of real words at the current substep.

Student Notebook Entry

p 15-16

(Syllables Section) On the Closed Syllable page, have the student add the following example words: **links, job** ①

In the Mark Words section, have the student practice marking a closed syllable and a closed syllable with a suffix.

līnk@ **jōb**
c c

p 16

On the same page, once nonsense words have been introduced, have the student add these example words: **vob, ched**

Next, have the student practice marking these words.

vōb **chēd**
c c

p 16

3 - WORD CARDS

Phonetically Regular Words: Have the student read a "fat stack" of previous substep words, focusing on automaticity and weaving discussion of selected concepts and previously introduced vocabulary words. Then, use current substep Word Cards to focus on new concepts, decoding accuracy, and, as mastered, automaticity. Also target new vocabulary words, having the student enter these into the Student Portfolio. Vary Word Card activities as appropriate.

High Frequency Words: Have the student read the high frequency word packet separately from the phonetically regular words. Include previously introduced words until mastered and introduce new high frequency words a few at a time.

4 - WORDLIST READING

Practice: From the current substep wordlists, select 5-6 words from a single wordlist that reflect your instruction for that day and have the student read them for practice. Discuss current concept, targeting trouble spots.

Charting: Using another wordlist that also reflects your instruction from the current substep, have the student read 15 words aloud. Then, record all errors on the Wordlist Chart. Discuss and correct all errors with the student.

The following types of wordlists are provided:

- **ng**
- **nk**
- **ng** and **nk**
- + suffix
- nonsense words

5 - SENTENCE READING

Review high frequency words and untaught words at the top of the page as needed. Select ten sentences from the current substep and have the student read them silently, then aloud (one sentence at a time). Focus on accurate word reading, expression (prosody and intonation), and meaning of text. To develop fluency, model and practice proper phrasing of text using the penciling technique, as needed. Weave questions about concepts taught in current and previous substeps and discuss vocabulary and meaning.

Note

With the current substep words, have the student identify the welded sounds. If the student has difficulty distinguishing pairs (e.g., **ong** vs **ung**), be sure to make additional word cards with these pairs (**song**, **sung**) to practice. Once the student is accurate with the current words, mix these with previous substep words to focus on automaticity.

Note

Be sure to have the student practice reading words with suffixes in Parts 2 and 3 of the lesson before including this for charting.

Weave with Questions

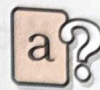

Examples:

Are there any words with a welded sound?

Are there any closed-syllable words in that sentence?

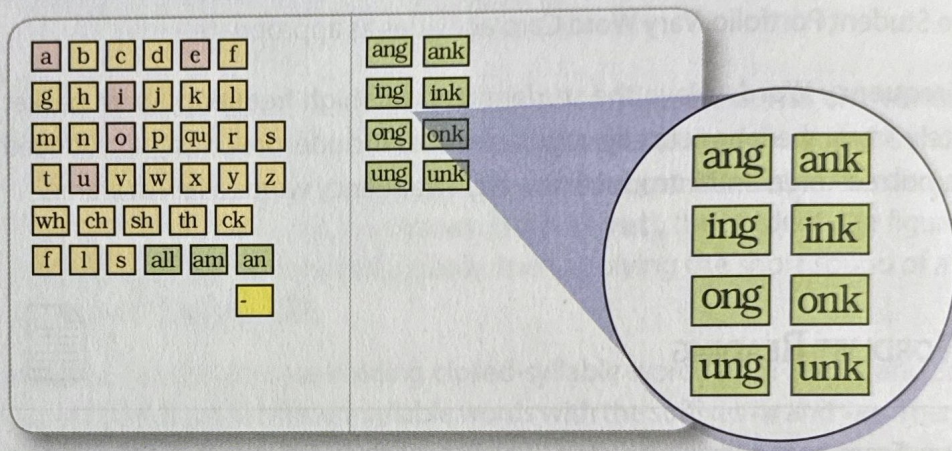

Spelling

6 - QUICK DRILL IN REVERSE

Dictate a selection of previously taught vowel, consonant, and welded phonemes. Prompt the student to repeat the sound and then name the letter(s) while pointing to the appropriate Letter Tile(s).

Add the new welded Letter Tiles:

Dictate the following new sounds, one at a time in random order:

/ang/ /ing/ /ong/ /ung/ /ank/ /ink/ /onk/ /unk/

Remember to have the student repeat the sound, then ask "What says ____?" The student should answer, naming letter(s) while pointing to the appropriate tile.

Dictate word elements (suffixes) only as needed. Prompt the student to repeat, select the appropriate manipulative (blank suffix tile) and then write it on the table with a finger while orally spelling, adding the dash.

7 - TEACH & REVIEW CONCEPTS FOR SPELLING

Dictate three to four previous substep words. Prompt the student to repeat the word (segmenting as needed) and then spell the word with the Letter Tiles and Suffix Tile/Card (as needed). The student may subvocally say the sounds while building the word, if needed. The student should spell the word orally after it is built with the Letter Tiles.

Introductory and Ongoing Lessons: Spelling of Welded Sounds

Dictate a Substep 2.1 word (such as **pink**) and ask the student to repeat and tap out the word, then select the tiles needed to form the word. Direct the student to use the green Letter Tiles for spelling **ng** and **nk** welded sounds rather than three individual tiles. Be sure the student orally spells the word after finding the letters.

Spelling

Next, dictate a Substep 2.1 word with a suffix (such as **winks**) and have the student repeat the word. Ask the student to name the word without the suffix (**wink**). Have the student tap the base word and find the corresponding Letter Tiles. Ask, "That is **wink**, now how do you make it **winks**?"

The student should add the **s** and then spell the whole word. ①

Student Notebook Entry

(Spelling Section) On the Ways to Spell /k/ page, have the student enter examples for **ank**, **ink**, **onk** and **unk**:
bank, **think**, **honk**, **sunk**

Subsequent Lessons: Teach Spelling of Closed-Syllable Words

Select words from Step 1 and Substep 2.1. Dictate a word, such as **job**. Have the student repeat, tap (if needed) and spell with Letter Tiles. Direct the student to then spell the word orally. Ask, "Is this a closed-syllable? Why?" Have the student explain why **job** is a closed syllable (only one vowel, followed by at least one consonant). Dictate additional closed-syllable words for spelling practice.

When ready, include nonsense words.

8 - WRITTEN WORK DICTATION

Dictate sounds, word elements, words, and phrases from previous and current substeps. Also, dictate sentences from the current substep. Be sure the student repeats all dictation prior to spelling. Have the student circle high frequency words, then guide the proofreading process for phrases and sentences. Direct the student to mark some concepts in words and sentences, and scoop the sentences into phrases.

Mark Words

Box welded sounds:

king bank

Mark closed syllables:

sink well
c c

Underline base words and circle suffixes:

lung⑤ king⑤

FYI

Remember that when reading and spelling words with a suffix, a student **taps the word** without the suffix only, if needed. The student does not tap the suffix.

SPELLING WORDS WITH A SUFFIX

Teacher dictates the word **songs**. The student repeats the word **songs**, then names the word without the suffix (**song**). The student taps the base word if needed, then spells **s o n g**. Lastly, the student also adds **-s**.

The purpose of this is to emphasize the structure of base word + suffix and to first spell the word without the suffix.

Note

Be sure to practice marking closed syllables often.
