Syllable Types

Closed Syllable

(2.1)

1. This syllable can only have **one vowel**.
2. The vowel is followed by **one or more consonants** (closed in).
3. The vowel sound is **short**. To indicate the short sound, the vowel is marked with a breve (˘).
4. This syllable can be combined with other syllables to make **multisyllabic** words.

Vowel-Consonant-e Syllable

(4.1)

1. This syllable has a **vowel**, then a **consonant**, then an **e**.
2. The first vowel is **long**. To indicate the long sound, the vowel is marked with a macron (¯).
3. The **e** is silent.
4. This syllable can be combined with other syllables to make **multisyllabic** words.

The Rules of Syllable Division

(3.1-6.4)

One Consonant (vcv)

Use one consonant to “close in” the first syllable:

topic

(3.1)

If a word is a compound word, split between the two words:

sunup

(3.1)

One consonant usually goes with the second syllable:

locate

(5.2)

Two Consonants (vccv)

Divide between two consonants:

index

(3.1)

Keep digraphs together:

chicken

(3.1)

If a word is a compound word, split between the two words:

sunset

(3.1)

A blend may stay together in the second syllable, especially if there is a prefix in the first syllable:

preplan

(5.2)

Divide just before the consonant in a word ending in a final stable syllable:

bugle

(6.4)

Three Consonants (vcccv)

Keep digraphs together:

ethnic

(3.1)

If a word is a compound word, split between the two words; the digraph may be in the first syllable:

bathtub

(3.1)

Blend stays together in second syllable:

hundred

(3.2)

Divide after the first consonant in a word ending in a final stable syllable:

juggle

(6.4)

Four Consonants (vcccv)

Watch for compound words that contain digraphs, blends, and welded sounds; divide between them:

dishcloth

(3.2)

Watch for three-letter blends in the second syllable:

construct

(3.3)

Suffixes

(1.6 - 6.2)

Base word: The smallest form of a word which contains the core meaning and stands alone without any additional prefixes or suffixes.

Suffix: A suffix can be **added to a stand-alone base word**. It usually indicates a part of speech and it can also add to the meaning of the word.

The Most Common Suffixes:

bug + s = bugs (1.6) fish + ing = fishing (3.5)

mix + es = mixes (1.6) rent + ed = rented (3.5)

A base word can be altered when a suffix is added, e.g. completing and fanciful. (Steps 7-12)
A suffix can be added to a base element as part of a complex word, e.g. rupture. (Steps 7-12)

Mark Words

-ment	<u>equipment</u>	(6.1)
-ness	<u>illness</u>	(6.1)
-ty	<u>safety</u>	(6.1)

Compound Words

(3.1 - 6.4)

A compound word is made up of two or more words, both contributing to the meaning of the new word.

Example Words:

<u>sunset</u> (3.1)	<u>gumball</u> (3.1)
<u>windmill</u> (3.2)	<u>sandbox</u> (3.2)
<u>baseball</u> (4.2)	<u>sunshine</u> (4.2)
<u>babysit</u> (5.4)	<u>humankind</u> (5.4)
<u>tablecloth</u> (6.4)	<u>candlestick</u> (6.4)

A compound word can also be made up of two or more base elements such as Greek combining forms, e.g. **photograph**. (Steps 7-12)
